

I am writing in regards to the proposed expansion of Low Power FM, (MB Docket No. 04-233). I am gravely concerned about this proposal. My whole family and I are avid listeners of K-Love, heard in Flint on 88.9. K-Love is literally on in my home every waking moment. My children even listen to it while they sleep.

K-Love provides a positive influence on my children. It provides safe, family friendly music, news and other programming. It uplifts me spiritually and emotionally. These are things that no other station could provide.

In addition, it is not just our family who would be affected. This issue affects our community. Several friends of mine are avid K-Love listeners. As I drive around, I see numerous 89.9 bumper stickers. K-Love offers listeners a place to call to seek guidance, as well as to receive prayer. If our radio stations were displaced by an LPFM, the results would be terrible. Our community would lose the positive influence, the family safe programming, the uplifting encouraging songs, and the caring staff who take the time to speak with and pray for individuals of our community. No LPFM will service us as K-Love is currently doing.

In conclusion, stations such as K-Love offer invaluable services to the public. Please do not endanger these essential services by allowing LPFM to take priority. Doing so would not only negatively affect my family; the ramifications will ripple throughout our community. I am urgently asking you to not let LPFM stations take priority over stations such as K-Love. Doing so would be a grave disservice.

Respectfully yours,

Rochelle Donnelly
